Vision Zero Pledgers: Boy Scouts of America local Troop 655 visited LADOT this week and have taken the Vision Zero pledge: Zero traffic fatalities in Los Angeles by 2025

Who We Are

Kyle Flake, Transportation Engineer Associate III, Project Delivery: Construction Management

With over 10 years of experience managing construction engineering projects for LADOT in different parts of the city, Kyle brings a lot of experience to his tasks. This includes supervising and overseeing the work of contractors, and coordination with our electricians and Public Works Department inspectors to complete each project. He also analyzes and solves complex construction issues in a timely and cost efficient matter.

The Construction Management Division works closely with the LADOT Project Delivery Design groups, as well as ATSAC Center Operations and District Operations. They also work with outside agencies such as Contract Administration, Department of Water and Power, Bureau of Street Lighting, Caltrans and the County of Los Angeles.

The value that best represents Kyle is 'problem-solving' because not only is he involved in solving construction related issues but also solving problems with the public and creating safer conditions for people who walk, roll, ride, take transit and drive. Some notable projects that he has worked on include New Traffic Signals at W. 33rd St. and Central Ave, and at Avenue 55 and Figueroa St. Also, the installation of a new crosswalk at Westwood Blvd. between Kinross Ave. and Weyburn Ave.

Thank you Kyle for your commitment to outstanding customer service, and for developing great problem-solving skills.

LADOT Video: No Right Turn On Red Safety Improvement

Signal timing changes in front of Thomas Starr King Middle School at Fountain and Myra Avenues now includes an extended pedestrian-only crossing phase during early morning and

late afternoon school hours. No Right Turn On Red (NRTOR) signage was installed to effect this change. See here the first NRTOR implementation from LADOT as part of the City of Los Angeles' Vision Zero efforts to improve school zone safety. For more about [Vision Zero please visit here.](#)
